

## FIRST TIME LOGGING IN

---

Initially when your account is first created, your password will be in the format: MMDDXXXX (where MM is your Birth-Month, DD is your Birthday, and XXXX is **the last four digits of your student ID number**). When you login for the first time, you will be asked to change your password. Your new password must be at least **8** characters long. The password must contain three different classes (Upper letters, Lower letters, Numbers, and Punctuation marks).

**NOTE:** Your **Computer Science** Username may be different from your **Ryerson** Username. Please make sure to use your CS Username in all Computer Science labs.

## LOGGING INTO WINDOWS

---

Windows 7 machines are located in labs (ENG201, ENG202, ENG203, ENG205, and ENG206) and they can only be accessed locally.

To begin, make sure the PC you are using is currently running Windows7. If it is not, restart the PC and choose Windows from the boot menu. When Windows has finished loading you will be presented with a login prompt where you must type your Computer Science username and password.

## LOGGING INTO LINUX

---

You can access Linux Local or Linux moon from PCs in the labs (ENG201, ENG202, ENG203, ENG205, ENG206, and ENG211).

For Linux Local, make sure the PC you are using is currently running Linux Local. If it is not, restart the PC and choose Linux local from Boot menu. When Linux has finished loading you will be presented with a login prompt where you must type your Computer Science username and password.

For Linux moon, make sure the PC you are using is currently running on one of moon's server. If it is not, restart the PC and choose Linux moon from Boot menu. Then choose one of moon servers from the menu like elara or metis. When Linux has finished loading you will be presented with a login prompt where you must type your Computer Science username and password.

### How to SSH to Linux moon from windows?

Load a Secure Shell client application, enter the hostname 'moon.scs.ryerson.ca', Port22, and use your Computer Science username and password.

## LOGGING INTO MAC OS X

---

You can access MAC OS X from PCs only in the lab ENG211.

To begin, make sure the PC you are using is currently running MAC OS X. If it is not, restart the PC and choose MAC OS X. When MAC OS X has finished loading you will be presented with a login prompt where you must type your Computer Science username and password.

**NOTE:** It is **\*VERY\*** important that you always **log off** when you are done, whether you are logged into Windows, Linux or MAC OS X.

## CHANGING YOUR PASSWORD

---

Passwords on Computer Science Department will be expired after 6 months.

On Windows: Log in to Windows 7 machine and hit Ctrl-Alt-Delete, and then choose "Change Password".

On Linux: Log in or ssh to any Linux servers, open a terminal and type 'passwd'.

**NOTE:** Your new password must be at least **8** characters long. The password must contain three different classes (Upper letters, Lower letters, Numbers, and Punctuation marks) and not like the old ones. Choose new password.
